

HD ABRASION U-DOZER BLADE**OVERVIEW**

Tough performance guaranteed! **Dymax Heavy Duty Abrasion U-Dozer Blades** feature U shaped wings and are built to withstand the toughest mining environments. The wings of the blade provide improved load retention and yield higher capacities over traditional straight and Semi-U dozer blades. Dymax HD Abrasion U Dozer Blades feature rock guards, wear liners, white iron wear blocks, replaceable side shrouds and vertical slat rock guards.

With 28 degree wing angles, these blades allow for improved capacities and material retention during the push. These Dymax blades are built upon a family heritage dating back to the 1950s, when Balderson dozer blades were used to help build the US interstate highway systems and roads during the Korean war.

Dymax HD Abrasion U-Dozer Blades, sometimes referred to as Taconite blades, are available for Caterpillar, Komatsu, John Deere, Liebherr Crawler Dozer and Track Type Tractors.

The Balderson Family has been building dozer blades for more than 70 years. It's in our DNA.

FEATURES AND SPECIFICATIONS

- Built with a 28° wing angle .
- Includes replaceable OEM brand cutting edges.
- Fits factory outside mount push arms.
- Available with RokGaard Wear Package for severe abrasion resistance and moderate to high impact environments.
- Available with Hardox 400 and Hardox 500 Wear Package for high impact, abrasive applications.
- Available with white iron wear blocks, side replacement shrouds and other types of wear protection.
