

BLOCK HANDLING QUARRY FORKS

OVERVIEW

Dymax Block Handling Forks are built to provide years of productive use, and are backed by the best service in the industry.

Dymax Block Handling Forks are available in shaft mounted or welded tine configurations. Tines are made from forged steel and heat treated to provide long wear service life. Shaft mounted models provide for easy replacement of the fork tine.

Ideally suited for handling blocks of stone in quarry and mining application.

FEATURES

- Forged heat treated fork tines.
- Shaft or welded fixed tine models.
- Hi-strength durable frame construction.
- Can be made to pin to loader arms or Dymax Block Handling Quick Coupler.
